

### **Executive Summary**

#### **Company Overview**

- Incorporated in 1980, Satia Industries Limited (SIL), is one of the biggest and completely integrated Wood and Agro based paper manufacturers.
- SIL's products are extensively used in the printing of books, directories, envelopes, diaries, calendars, computer stationery, manufacture annual copy reports, etc.

#### **Key Clientele**

relationship with State book Corporations 40% and around from revenue comes these organisations.

SIL has long standing

• The remaining revenue attributes to the Public Private and Sector Companies.

#### **Manufacturing and Distribution Network:**

- Manufacturing plant based out of Muktsar with capacity to manufacture 1,05,000 MT per annum.
- Completely integrated manufacturing operations with 3 paper machines, 100% inhouse power generation and effluent treatment.
- Strong Distribution Network: 70 dealers and 3 branch offices.

#### **FY19 Financial Snapshot**

Operational Revenue INR 7,384 Mn

**EBITDA** INR 1.641 Mn **EBITDA Margin** 22.22%

PAT **INR 878 Mn**  **PAT Margin** 11.89%

**ROF** 29% **ROCF** 26%

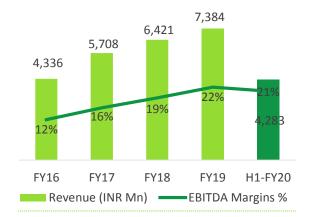

### About The Company

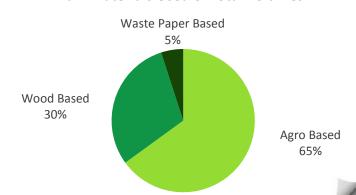

- Incorporated in 1980 by Dr. Ajay Satia, Satia Industries Limited (SIL) started its commercial production of printing and writing paper at Muktsar, Punjab in 1984.
- SIL is one of the biggest Wood and Agro based paper plants in India manufacturing paper using wood chips, veneer waste, wheat straw, sarkanda, etc.
- The Company has a fully integrated manufacturing facility, which includes paper machines, pulping machinery, chemical recovery plant and power generation plant.
- Fully integrated production facility gives superior advantage in terms of cost efficiency and environmental compliance, ultimately leading to superior margin profile compared to peers.
- With a view to improve the quality of pulp and also to save on cooking chemicals, a Continuous Digester has been installed by the Company.
- The product profile includes Super Snow White, Snow White, Photocopier paper, Map litho, Colored paper, Ledger paper, Cartridge paper, Duplicating, bond paper with and without watermarks and Chromo (Art) paper from GSM range 42 to 200 GSM.
- Satia Industries Limited market its product through dealer network located all over India and through Branches at Jaipur, Delhi & Chandigarh.

#### Operational Revenue (INR Mn) & EBITDA Margin (%

#### **Raw Materials Used of Total Volumes**

### Key Management Personnel

**Dr. Ajay Satia** Chairman & M.D

- Dr. Satia set up the integrated paper mill in 1984.
- His vision to adopt technological changes and economies of scale along with timely capital infusion has brought the unit among the best in the industry in terms of pulping strength, power self-sufficiency, effluent treatment and meeting the environmental norms.
- Dr. Satia has a passion for work and possesses unparalleled enterprising spirit for expansion and modernisation.
- His greatest strength lies in building and retaining a strong and trusted team which has turned his dreams into reality.

#### R.K. Bhandari (MBA) - Joint Managing Director

Looks after marketing and other administrative responsibilities since the last 32 years

#### **Chirag Satia** - **Executive Director**

Chirag has been driving force behind new inititatives since he joined in 2015 and looks after Finance, Accounts and Commercial Operations. His enterprising spirit and forward looking vision has added new energy to the workforce.

#### A.C. Ahuja – *Director*

Ex. Executive Director IFCI, Delhi

Hardev Singh - Director (Technical)

Has a wide experience in installation of projects

**Arun Kumar Gupta** - **Director (Independent)** 

Senior Chartered Accountant

Ashok Kumar Gupta - Director (Independent)

A CAIIB and has 35 years of experience in Banking

Dr. Priti Lal Shivhare (MSC, Ph.D. Chemistry) - Director (Independent)

A scientist in Central Pulp and Paper Research Institute, Saharanpur, (U.P)

Inder Dev Singh - Director (Independent)

A retired personnel of PNB and has studied B.Com. and LLB and is a CAIIB

Dinesh Sharma – Director (Independent)

Masters in Chemical Engineering

S. K. Arora – Director (Independent)

Senior Chartered Accountant

Ashok Khurana (C.A.) - VP-Finance

R. K. Dhuria - Company Secretary

L.L.B.

### Key Milestones

Started production using a single paper machine with the capacity of 4,950 **MTPA** 

Production crossed 10.000 MTPA

Power cogeneration plant (5MW) was installed

2003

Increased capacity of the power plant to 23.30 MW

Additional Power generation capacity of 10.45 MW and New Solar plant with capacity 2.29 MW were installed

Achieved a significant production

1984

1993

2011-12

2016-17

2018-19

1980

Incorporation of the Company

1989

Second paper machine was installed

Third paper machine and 200 MTD pulp mill were installed.

A Chemical **Recovery Plant** and power plant (5MW) were installed

The Capacity of Chemical **Recovery Plant was** enhanced and also installed a Pulp Bleaching Plant

Added Solar Capacity of 3.25 MW

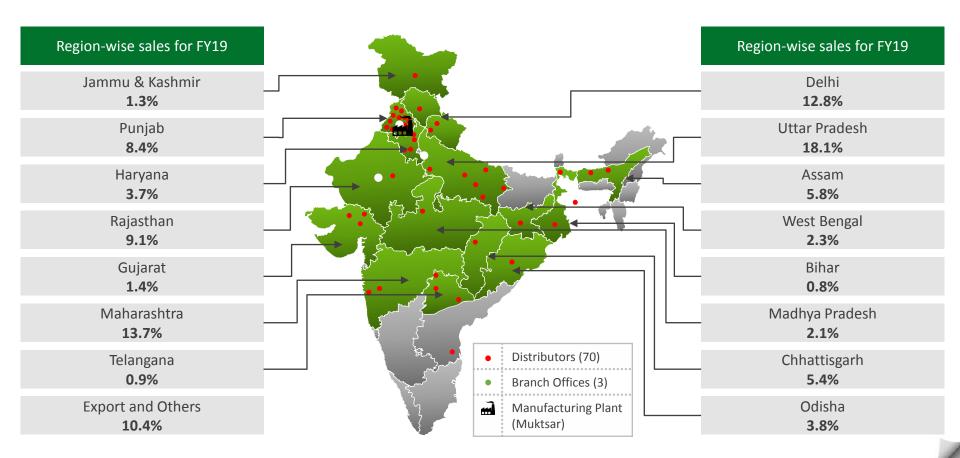

# Geographical Presence

### Manufacturing Facilities

Segment

#### **Pulping Facilities**

#### **Paper Machines**

#### **Chemical Recovery Plant**

#### **Power Generation**

Description

 Continuous Digester for cooking pulp, oxygen delignification and chlorine dioxide bleaching has been installed.

- Capacity of paper machines varies with operating speed and GSM of paper.
- Proposed: 300 TPD, already applied for Environment Clearances
- Project target commissioning is two and a half years subject to all Govt. permissions.
- Installed Chemical two Recovery boilers with a capex of INR 850 Mn to process black liquor for reconversion into caustic soda.
- It also helps in environment compliance.

 Installed three turbine generating sets at a total capex of INR 871.6 Mn and a solar power plant at capex of INR 224.2 Mn.

### Capex Plan

#### Agro – Residue

#### **Wood chips**

#### **Waste Paper**

#### **CRP**

#### In-house power generation

Current Capacity 1,05,000 MT of Paper

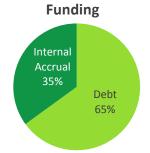

Capacity
Expansion of
1,00,000 MT of
Paper

#### **Updates**

- Additional land has already been purchased
- Set of Equipments & Machinery has already been ordered
- Final Hearing for environmental compliance is expected to take place with the Ministry of Environment & Forests, Delhi
- Finances have been tied up for the project

Plant to be commissioned by the end of Q4-FY21

A similar greenfield capacity expansion of 300 TPD would cost around INR 1,000 Cr and would take a timeline of around 40 months to be operational.

### Paper Cutlery Segment

- Prime Minister Sh. Narendra Modi gave an ambitious call to eliminate all single-use plastic products in the country by 2022 and SIL plans to make most of this opportunity in the national movement to replace plastic and styro foam from food delivery packaging with sustainable packaged products
- The company has already entered into Virgin fibre based Cup stock segment and plans to venture into the paper cutlery segment with an initial capital outlay of INR 15-18 Cr
- To establish this segment SIL has plans to enter into a partnership with an MNC which is one of the world's largest leading food brands
- SIL will be producing the finishing products of sustainable packaging and the marketing operations will be handled by the proposed Associate in India and abroad
- Target for commencement of production is Q1-FY21

Initial Production Capacity of 8 TPD

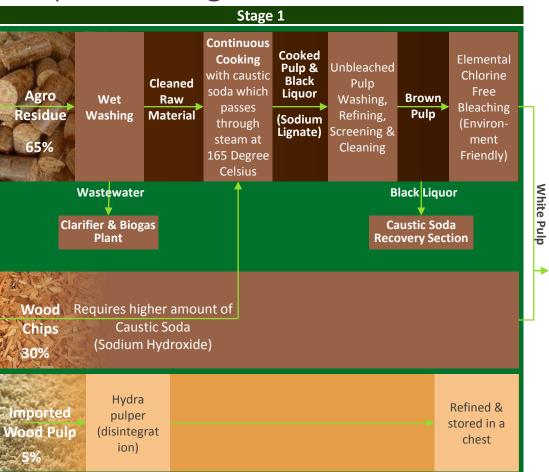

To be enhanced to 32 TPD

### Paper Making Process

Stage 2
Stock Preparation

Different types of Pulp (Agro, wood, imported wood) is mixed in different proportions as per the required quality additives like AKD, PAC, whitening Agent, Wet End Additives and Fillers Stage 3
Paper Making

Sheet Forming-> Wet Sheet

De-watering through 3 stages: Vacuum Suction, Pressing, Evaporation (Drying)

Calendaring for smoothness and evenness

**Roll Forming** 

Stage 4
Converting
and Finishing

Sheeting

Rewinding

Cutting

### **Effluent Treatment**

Inorganic matter becomes Sodium Carbonate

Treated with Calcium Hydroxide Calcium Carbonate (Limestone) Sold in markets

Sodium Hydroxide (Caustic Soda) Reused after 90 -95% recovery rate

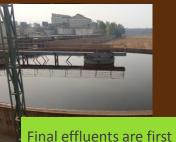

Waste water from paper machine is clarified and reused in washing of pulp in bleaching stages

Maximum circulation of bleaching plant filtrate

Final effluents are first treated at the Effluent Treatment Plant & then passed to the Eucalyptus Plantations

# Top Clients

# Myths Vs Realities of the Paper Industry

Myth	
	Reality
Denuding forests	Paper industry in India is also agro and rural based. Industry led agro/farm forestry in collaboration with farmers have brought over 125,000 hectares under pulp wood plantations.
Disturbs ecological balance	It is wood positive. The industry grows more trees through its agro-forestry initiative than it harvests. Moreover, pulp and paper industry consumes only 3% of the national requirement of wood while major consumption is as fuel wood (89.5%) and timber (7.5%).
The sun has set on India's paper industry	Overall paper consumption is projected to increase to 24 million ton in 2024-25 from 15 million ton currently. Every one kg increment per capita consumption results in additional demand of more than 1 MTPA.
Technologically outdated	An investment of more than USD 5 Bn. has been made by the industry during the last five years in capacity enhancement, technology upgradation and various acquisitions.
Unsustainable industry	Paper is biodegradable, recyclable and sustainable.
Puts undue strain on water and energy resources	Earlier, paper mills used to consume 200 cubic meters of water to produce a ton of paper. Now, the integrated mills have reduced the usage to 50 cubic meters with efforts on for 40 cubic meters.
Lobbies for access to forests repeatedly	Out of the total degraded forest land of 29 Mn hectares, the paper industry is asking for only 10%. Growing pulpwood trees on degraded land will lead to a fillip in rural employment and add to the green cover of India.

### Certifications

This is to certify that

#### Satia Industries Ltd.

Village - Rupana, Muktsar - Malout Road, Muktsar - 152032 (Punjab), India.

Version July 2013

# Key Strengths

Wheat Straw is cheap and easily available locally

No other paper mill in a 100 Km radius

Chemical Recovery Plant to treat Black Liquor, oxygen plant for Delignification, production of Chlorine Dioxide for Bleaching & Pulping

Co-power generation to reduce cost

27.95 MW capacity run on Biomass and process intermediate- Black Liquor

3 Branch Offices and 70 Distributors

Long standing relationships with State Text Book Boards

In-house treatment of pollutants and 540 Acres of Eucalyptus Plantations and Carbon Credit Surplus

# Operating Efficiency

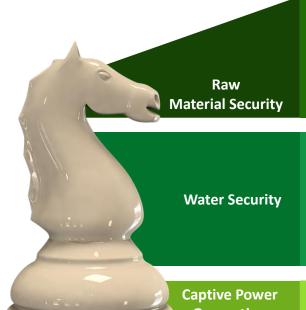

#### **Operating Cost Bridge**

# Strategic Advantage

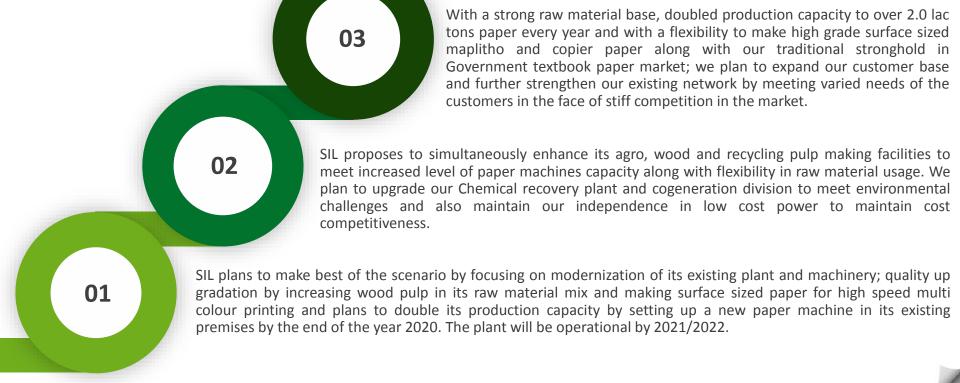

- SIL has the capability and flexibility to use all three kinds of pulp made from agro residue, wood and waste paper.
- It procures raw materials like wheat straw, sarkanda and wood chips from the area adjacent to the manufacturing plant in Punjab.
- No other paper mill, in a 100 km, radius ensures easy and cheap availability.
- Water is imperative at each stage of production and can lead to loss of machine days in case of shortage.
- The fresh water requirement is 18,500 m3 /day for Agro & Wood-Based Pulp to produce writing & printing paper 390 TPD.
- The Company has an approval from the state irrigation department for fresh water withdrawal of 7.5 cusec from Arniwala Canal, which is at a distance of 1.8 km.
- Generation
- With the high cost of power directly affecting profits of paper industries, the best option is to install own captive power plants to manage production schedules without unplanned downtime and lower costs.
- Against the huge requirement of steam at 10Kg/cm2 pressure for pulp making and steam at 4Kg/cm2 pressure for drying paper; SIL has installed 62Kg/cm2 steam pressure boilers and 27.95 MW power is co-generated from energy produced in pressure reduction which helps in huge cost savings.

### Future Growth Strategy

### **Environmental Compliance**

Environment Compliance though a legal necessity; SIL considers this as its moral responsibility and has undertaken many steps to ensure that no harm is done to the environment:

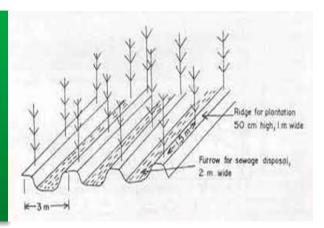

- **Eucalyptus Plantation**: SIL uses the natural quality of Eucalyptus Plant for natural pumping and evaporation of ground water through its leaves into the atmosphere and has developed 540 acres of Eucalyptus Plantation for waste water handling. No water is discharged into any water body.
- SIL has adequate water and air pollution control devices to meet the prescribed norms of Water and Air pollution and has got the necessary Consent to operate from the PPCB, Punjab under different Acts.
- SIL has a fish tank with the treated waste water to check fish survival in the treated effluent and establishes that it is not harmful for aquatic life.
- Solid waste is used by card board manufacturers and boiler ash goes into land filling.
- SIL is planning to tie up with cement companies to dispose lime sludge.
- Methane is used for power generation or as fuel in the boiler.

## Karnal Technology

#### **Process**

- The Karnal Technology involves growing trees on ridges 1m wide and 50cm high wand disposing of the untreated sewage in furrows.
- The effluent is consumed within 12-18 hours and it is possible to dispose off 0.3 to 1.0 ML of effluent per day per hectare through this technique.

#### **Plantation**

Eucalyptus plant is widely used for Karnal Technology due to the capacity to transpire large amounts of water and ability to remain active through out the year.

#### **Low Cost**

- The expenditure of adopting this technology involves cost of making ridges, plantation and their care.
- The implementation does not involve skilled labour and relatively unfertile wastelands can be used for this purpose.

#### **Zero Effective Discharge**

- This technique utilizes the entire biomass as living filter for supplying nutrients to soil and plant.
- Further, as forest plants are to be used for fuel wood, timber or pulp, there is no chance of pathogens, heavy metals and organic compounds to enter into the human food chain system.

#### **Revenue Generation**

This system generates gross returns from the sale of fuel wood and the sludge accumulating in the furrows along with the decaying forest litter.

# Corporate Social Responsibility

SIL believes that the corporate sector are economic organs of the society and therefore endeavors to make a positive difference to the society by trying to build a better tomorrow.

- Total amount spent in FY19: INR 11.2 Mn
- Total amount spent during FY18: INR 4.9 Mn
- The management has approved **INR 25 Mn** for CSR program in surrounding villages. The activities mentioned therein shall be carried out within a **time** frame of 5 years (2017-18 to 2021-22)

The sectors identified under the scope of CSR activities are as follows:

**Community Health Improvement**: Periodical medical checkups, blood donation camps to be organized near the project site, eye check-up camps, health awareness camps for mother and child and health and hygiene practices

**Community Education Facilities**: Augmentation of furniture, blackboard, etc. in village schools, award scholarships to meritorious students, distribution of educational books, stationary, uniforms, aids, etc.

Community Welfare activities: Development of worship places as well as beautification, distribution of seeds & saplings, promotion & support to various Govt. schemes

Community Water Conservation: Rain water harvesting, ground water recharge pits and water conservation awareness programs

**Community Capacity Building**: Development of vocational training for technical skills, self employment trainings for women, such as, stitching, embroidery, tailoring, and handicrafts, etc.

Infrastructural Development: Village pond retrieval and R.O installation

A forestation Programs: Plantation of trees in village road sides

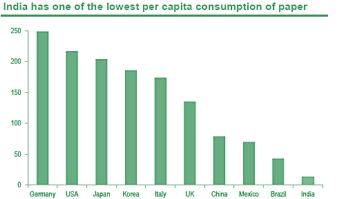

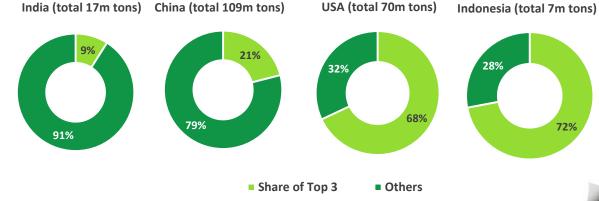

# Paper Industry Overview

- Globally, India is the fastest growing paper market 5-year (FY11 FY16) with a CAGR of consumption is 8% in comparison to 1% globally.
- Paper demands grow in tandem (gain momentum) with the GDP growth rate in a country.
   Over the last 10-yr period (2006-2016), India's paper demand grew 8.1%, whereas GDP CAGR was 7.3%. Thus, the Company believes that India's high GDP growth rate ensures that base demand growth for paper is high.
- Moreover, paper usage per capita in India lags in comparison to most other major economies 13 kg p.a. vs 150-250 kg p.a. for more developed countries.
- Combined with rapidly improving literacy rates and increasing office documentation needs, we expect demand growth in writing and printing paper in India to continue [Literacy rate improved to 75% in 2016 from 63% in 2001].
- The Indian paper industry is highly fragmented with more than 1000 mills, of which about 750 mills are operational and top 3 players account for only 9% of the market.

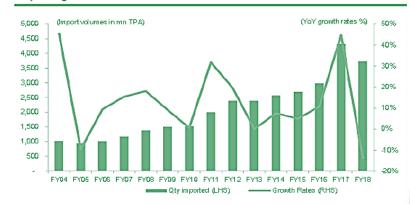

## Paper Industry Overview

- India is the fastest growing major paper market in the world.
- An appreciating rupee made imports attractive in FY17.
- Anti-dumping duties were imposed by the US in 2016 and 2017, which led to diversion of supply from US to Indian markets.
- Free Trade Agreements with ASEAN and South Korea led to an increase in exports at 10Yr CAGR of 15% and 8%, respectively.
- Even though this dynamic may change as the rupee depreciates\antidumping duty is effected, open imports have already forced companies to increase cost efficiency\consolidate.

#### Imports grew at 9.3% CAGR from FY13 to FY18

# Challenges of Environmental Compliance

• The pulp and paper industry is among the world's largest generators of air and water pollutants, waste products and gases that cause climate change. Thus, heavy investment is required by companies to be environmentally compliant. Multiple norms have been introduced over the years, which have covered paper manufacturing companies.

CREP, 2003

CWRPP, 2012

CWRPP, 2015 (Ganga Basin States)

National Charter (In the pipeline)

- Corporate Responsibility for Environment Protection (CREP) had some key action points utilization of treated effluent wherever possible, reduce wastewater discharge to less than 140 m3/tonne of paper by 2005, etc.
- Charter for Water Recycling & Pollution Prevention in Pulp & Paper Industries (CWRPP), not only highlighted the Best Available Techniques (BAT) based on European Union's BREF document, but also laid down stringent water consumption, effluent generation and effluent characteristics norms for the industry to be achieved in two phases, i.e., short-term goals (by March 2016) and long-term goals (by March 2017). Water consumption norm of 50 m3/tonne of paper produced has already been achieved by the Industry.
- National Charter is in the pipeline. Large mills have already incurred capex to adopt environmental friendly technologies and thus, would not have a huge impact.
- Central Pollution Control Board (CPCB) advises the Central government on matters concerning air and water pollution. It has classified pulp and paper in the Red category, which means environmental clearance for new factories would be strict.
- Recently, 12 environmentally non-compliant paper mills were issued closure notices by CPCB.

# Indian Paper Industry is Ripe for Consolidation

**High Capital Intensity** - Investment in land and machinery, repairs and maintenance of mills, technology, cost of environmental compliance, growing wood plantations and establishing a distribution network all make manufacturing paper a capital intensive task.

**Economies of scale** - The average capacity of an Indian Paper Mill is about 21,373 TPA, which is less than 1/5th of the average capacity of European mills, and about 1/9th the size of the average US mill.

Imports will pressure inefficient players further.

It is expensive to be environmentally compliant - The pulp and paper industry is among the world's largest producers of water pollutants and waste products. CPCB has classified Pulp and Paper industry into the Red category, which means environmental clearance for new factories would be strict.

**Advent of GST** - GST has been introduced at 12-18% for most paper categories which implies that the margin cushion available to small companies (likely tax avoiding) may be pressured.

**Industry Stress** - Multiple inorganic opportunities are available in India, which can help large players with strong balance sheets consolidate.
